All the kids longed for one day to visit the "Charlie and the Chocolate Factory" because they were interested in the factory.

The kids went to the city of Sconedonia, where George Wonka, one of the chocolate factories.

One day George Wonka decided to have his factory to a young person because he had a plan: he's getting old and he has to leave the world to his grandson, Charlie Bucket. He has five children, but only one is allowed to stay in the factory.

It was a big day for Charlie and his family. They were all excited to see their grandpa and to see the factory.

Charlie is the only one who stays in the factory. He will have the chance to see the factory and to see the factory.

Charlie is a very good and intelligent boy. He is a very good boy. He is a very good boy. He is a very good boy.
